

Could you spare about 2hrs helping us understand Cancer Related Cognitive Impairment or 'Brain Fog'?

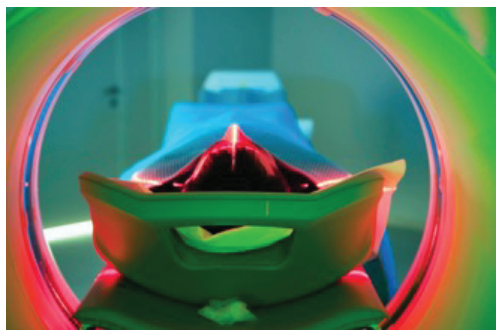

UNIVERSITY OF
AUCKLAND
Waipapa Taumata Rau
NEW ZEALAND

WHY: To see if the brain changes in those who have cancer or get treatment.

WHO: Women who have just received a breast cancer diagnosis AND women who are healthy and want to help.

WHAT is involved: Having two brain scans in a MRI scanner and completing three questionnaires. The scans will be at different times (for patients one before your surgery and one after your first chemotherapy)

HOW LONG: Each visit to the MRI scanner will last up to 1.5 hours. 50mins of this will be the brain scan.

WHERE: The University of Auckland Centre for Advanced Magnetic Resonance Imaging (CAMRI)
85 Park Road, Grafton, Auckland (parking arranged)

KOHA: \$50 countdown voucher
We can additionally cover travel up to \$50 with a MTA voucher

INTEREST:

If you are interested please scan the QR code for the participant information sheet and to complete the screening questionnaire.

Or send an email to Dr Marta Seretny.
